PROJECTS

AI-Powered Chatbot

AI-Powered Chatbot – Designed and developed an NLP-based chatbot using [Python, TensorFlow/Dialogflow/etc.] with features like intent recognition, sentiment analysis, context retention, and real-time responses. Improved user engagement and reduced workload across domains like customer service, education, and personal assistance.

Technology : HTML, CSS, JavaScript (AJAX) + PHP MySQL

AI Code Reviewer

AI Code Reviewer - is an intelligent web-based platform that automatically reviews and analyzes source code using AI and static analysis. The system helps developers identify bugs, performance issues, and coding best-practice violations before code is merged – similar to an automated pull request reviewer.

Technology : JavaScript , React ,Python FastAPI + MongoDB

Social Media Trend Dashboard

Social Media Trends Dashboard - is a frontend-only web application that visualizes and tracks trending topics, hashtags, and engagement metrics across multiple social media platforms. It provides users with interactive charts and insights to understand online trends, audience sentiment, and content performance – all within a clean and responsive dashboard interface.

Technology : JavaScript,HTML, CSS

Shop Designer

Developed a full-stack e-commerce platform where users can browse, search, and filter products, view details, manage carts and orders, and maintain profiles and wishlists. Implemented secure JWT-based authentication and file uploads for product images.

Technology: React,Node.js, Express.js,MySQL,JWT
